

# 1 2kWh Li-ion Battery Pack Unit GSA

What is a 1.2 kWh battery used for?

Their smaller weight make them ideally suited for off-grid energy storage, among other applications. These new 1.2-kWh models can be used in 12-V, 24-V or 48-V configurations and feature Bluetooth communication for easy health and performance monitoring.

What is a kilovault 1200 HLX battery?

KiloVault has released two new 1.2-kWh lithium batteries. The 1200 HLX and 1200 CHLX can handle 80 A of continuous charging current and 100 A of continuous discharging current. Their smaller weight make them ideally suited for off-grid energy storage, among other applications.

Do kilovault batteries need active cooling?

KiloVault's HLX and CHLX series batteries do not require active cooling, as their lithium iron phosphate (LFP) chemistry is less susceptible to thermal runaway. As they are lithium-based, these batteries do not require regular watering, desulphating or equalizing and do not produce dangerous off-gassing like lead-acid batteries do.

This battery energy and runtime calculator determines the theoretical capacity, charge, stored energy, and run time of a single battery and several batteries with the same characteristics connected in series and in parallel to form a battery ...
