

## 12 15 17 20KW Three-phase Hybrid Inverter OneSun

What is a sunsynk 3 phase 50kW hybrid inverter?

You have no recently viewed item. The Sunsynk 3-Phase 50kw Hybrid inverter is a highly efficient power management toolthat allows the user to hit those 'parity' targets by managing power flow from multiple sources such as solar, mains power (grid), and generators, and then effectively storing and releasing power as and when utilities require.

What kind of batteries does OneSun use?

ONESUN regard quality &safety as our lifeline. For batteries,we only use Class A LiFePO4 batteriesfrom China's top five brands,using BYD automotive-grade smart BMS technology Our inverters' core components are adopted with international brands. Such as,IGBT is from INFINEON,and MOSFET is from TOSHIBA.

What are the advantages of a three-phase hybrid inverter?

Product Advantage: The main indexes of three-phase hybrid inverters are in the leading position in the industry; the cost,performance and main technical indexes of industrial frequency inverters,off-grid hybrid inverters (high-frequency machines) and lithium batteries have significant advantages.
