

12 8V400Ah LiFePO4 Battery

What is the price of a 12V 280Ah LiFePO4 battery?

The price of a 12V 280Ah LiFePO4 battery from Sun Fun Kits is \$295/kWh! An error occurred while retrieving sharing information. Please try again later.

What is a 12V LiFePO4 battery used for?

A 12V LiFePO4 Battery is used as a solar energy storage cell and power supply for 12V household appliances, such as refrigerators, washing machines, TVs, monitors, and air conditioners. It is also perfect for powering various electric appliances of RVs during long-distance travel. Additionally, it is suitable for use on yachts, golf carts, and trolling motors.

Can victron inverters communicate with a 12.8V 400Ah battery?

[Reliable BMS] Our intelligent BMS (battery management system) provides always-on short-circuit and over/under voltage prevention, as well as temperature monitoring. The 12.8V 400Ah battery can communicate with Victron inverters. However, it cannot communicate with inverters from other brands.

What is a LiFePO4 multipurpose battery?

VoltGo's LiFePO4 Multipurpose Batteries are half the weight of similarly powerful lead acid batteries, making them easier to transport and install. Unlock your next adventure without breaking a sweat. VoltGo batteries are built with maintainability in mind.

What is the EG4 lithium battery capacity?

Introducing the EG4 Lithium Battery 12.8V (12V), boasting a robust 400Ah capacity and a formidable 5.12kWh power output, all managed by a formidable 200A internal battery management system (BMS).

What is a voltgo lithium phosphate (LFP) battery?

The VoltGo 12.8V 400Ah LiFePO4 lithium iron phosphate (LFP) battery from Voltgo is meticulously crafted for diverse applications. Featuring a 24/7-usable ABS shell, these modules incorporate an intelligent Battery Management System (BMS), providing notable benefits in safety, cycle life, balancing, and intelligent control. Designed for long-lasting, reliable energy storage, the Duracell 100Ah 12.8V Lithium (LiFePO4) battery is perfect for the off-grid lifestyle. Lighter, more durable, longer lifespan, and with more usable energy capacity than traditional Sealed ...

1. Longer battery life - 5000 times life cycle @60%DOD, 5 times more than lead acid batteries. 2. Low self-discharge <3.5% per month. 3. Free of charge memory. 4. Steady discharge and charge performance. 5. Outstanding thermal stability.
