

# 182 Mono PERC Bifacial SE Solar Cell

How many watts can a 182mm solar panel produce?

Laser SE combined with PERC technology makes 182mm solar cell rated power up to 7.58W at 23% efficiency. 72 pieces of 182mm Mono PERC solar cells combined with half-cut technology can make solar panels with power up to 545 watt. High power solar panel helps lower the BOS cost of solar PV system.

What are the characteristics of 182mm solar cell?

1. Type : Monocrystalline Solar Cell (182mm X 182mm, Diameter 247mm) 2. Geometrical properties (1) Shape of Solar Cell : pseudo-square with rounded corners (2) Length of wafer edge : 182 ± 0.25mm (3) Length (corner to corner) : 247 ± 0.25mm 3. Power of 182mm solar cell

What are the advantages of PERC solar panels?

72 pieces of 182mm Mono PERC solar cells combined with half-cut technology can make solar panels with power up to 545 watt. It is beneficial for lowering the BOS cost of solar power system. ?Process flow? ?Key features? Double side generation Higher output power Excellent low-light performance Lower temperature coefficient ?Technical Data?
