Solar Steel are manufacturers of steel modular ballasted support systems for commercial PV and Thermal collector project installations. We supply support systems for Landscape and Portrait installations in any configuration. All of our materials are UK only sourced to provide the highest quality systems along with unbeatable 15 year guarantees.

Solar Steel design and manufacture specialist green roof support systems for both landscape and Portrait PV panels. We can raise the panels to suitably clear the live vegetation thus avoiding any potential shading issues. The system is ballasted to protect the roof membrane and allow the green roof to easily grow in and around the structures.
