

3-Ph BluE Residential ESS E10KT KSTAR

What is a 3-pH blue residential ESS?

Chinese inverter manufacturer Kstar will launch a new series of residential hybrid storage systems 3-Ph BluE Residential ESS that integrates its own inverter technology and the lithium-ion storage solutions of China's Contemporary Amperex Technology (CATL).

Who makes ESS e10kt solar storage system?

Max. Altitude Shenzhen Kstar Science & Technology Co., Ltd. Solar Storage System Series 3-Ph BluE Residential ESS E10KT. Detailed profile including pictures and manufacturer PDF

Is CATL LFP battery better than ESS?

The new residential ESS with CATL Battery Solutions is said to boast a reduction in carbon use and improve power generation performance compared with previous PV products. The new 3-Ph BluE Residential energy storage system is much safer with CATL LFP Battery, which results from a stable "module, pack, system" triple protection, Kstar has said.

What are the features of CATL-KSTAR generator control system?

Based on the powerful technology from the joint venture CATL-KSTAR, the product comes with adjustable power in each phase, supporting diesel generator control (DI/DO), according to KSTAR. The product is featuring with a simple and efficient design. Modular design, Plug & Play, and mobile APP Monitoring greatly bring convenience for the customers.

What is ESS battery certification?

The cell certification is IEC/EN 62619, UN38.3, and UL1973. Keeping the same cell type LFP (without cobalt) with better safety performance, the battery model is mainly utilized in low voltage systems, which also strengthens the ESS's ability to handle the harsher environment.
