

ARK LFP Series 12V Lithium Battery

100AH 200AH 300AH

What are the features of LiFePO4 12V lithium battery 100Ah?

Great BMS Protection: Our LiFePO4 12V lithium battery 100AH has built-in BMS (Battery Management System) to protect it from overcharge, over-discharge, over-current, and short circuit. And high temperature cut off system will prevent charging temperature from exceeding 158°F (70°C).

What is the capacity of LiFePO4 batteries?

Support Capacity Expansion: Our 100Ah Deep Cycles LiFePO4 batteries can be connected in parallel or in series to get more capacity (Max 1200Ah) and higher voltage (24V, 36V, 48V), which is perfect for Solar System, RV, Travel Trailer, Caravan, Solar Power, Marine, Backup Power, Off-Grid.

How many batteries can be connected to a battery bank?

It also supports connections of up to 4 batteries in parallel and 4 batteries in series, allowing for expansion to a home battery bank system by configuring up to 16 batteries in series and parallel, resulting in a powerful 20.48 kWh power capacity.

How long does a 12V lithium battery last?

3. Optimal charging involves a 20A current for our lithium-ion battery. While the maximum charging current stands at 50A, exceeding this limit can result in a shortened battery lifespan. HQST's 12V lithium batteries come with a reassuring 10-year commitment to both product quality and service life.

Part 1: Series Connection of LiFePO4 Batteries 1.1 The Definition of Series Connection. Series connection of LiFePO4 batteries refers to connecting multiple cells in a sequence to increase the total voltage output. In this configuration, ...
