Could aluminum be the key to affordable seasonal energy storage?

Swiss researchers believe it could be the key to affordable seasonal storage of renewable energy, clearing a path for the decarbonization of the energy grid. Aluminum has an energy density more than 50 times higher than lithium ion, if you treat it as an energy storage medium in a redox cycle battery.

Could aluminum be the key to a redox cycle?

Aluminum, used in a redox cycle, has a massive energy density. Swiss researchers believe it could be the key to affordable seasonal storage of renewable energy, clearing a path for the decarbonization of the energy grid.

How much energy can a block of aluminum store?

As a 2020 report from the SPF team states, a single, one cubic meter (35.3 cu ft) block of aluminum can chemically store a remarkable amount of energy - some 23.5 megawatt-hours, more than 50 times what a good lithium-ion setup can do, or roughly enough to power the average US home for 2.2 years, on 2020 figures.

Are aluminum battery enclosures recyclable?

Aluminum battery enclosures or other platform parts typically give a weight saving of 40% compared to an equivalent steel design. Aluminum is infinitely recyclable with zero loss of properties. At end of life 96% of automotive aluminum content is recycled. Recycling aluminum only requires 5% of the energy needed for primary production.

Can aluminum batteries be used as rechargeable energy storage?

Secondly, the potential of aluminum (Al) batteries as rechargeable energy storage is underscored by their notable volumetric capacity attributed to its high density (2.7 g cm⁻³ at 25 °C) and its capacity to exchange three electrons, surpasses that of Li, Na, K, Mg, Ca, and Zn.

What is pseudocapacitive behavior in aluminum-ion energy storage systems?

Pseudocapacitive behavior in aluminum-ion energy storage systems. In energy storage systems, the behavior of batteries can sometimes transform into what is known as pseudocapacitive behavior, which resembles the characteristics of supercapacitors.
