

CZV 80-12 Canbat

What is czv series?

CZV series is our range of tubular gel OPzV batteries, developed with a robust construction for applications demanding frequent deep cycling, such as: OPzV batteries offer the highest cycle life among all other sealed lead acid batteries, with significant savings on the cost per cycle.

What are CANBAT tubular gel OPzV batteries?

Canbat tubular gel OPzV batteries offer high capacity reserve power and true deep cycling performance. With a design life of 20 years and a maintenance-free operation, OPzV batteries are perfect for regions with an unstable supply of electricity.

How long do CANBAT OPzV batteries last?

With a design life of 20 years and a maintenance-free operation, OPzV batteries are perfect for regions with an unstable supply of electricity. Canbat OPzV batteries are also completely spill-proof, which makes them safe to install anywhere, even in remote environments with minimal supervision.

Are CANBAT OPzV batteries safe?

Canbat OPzV batteries are also completely spill-proof, which makes them safe to install anywhere, even in remote environments with minimal supervision. OPzV batteries are also available in a front terminal design upon request. OPzV cells have gelled electrolytes and tubular positive plates, which work together to deliver superior cycle count.

What are OPzV batteries?

OPzV batteries offer the highest cycle life among all other lead-acid batteries, with significant savings on the cost per cycle. They are maintenance-free and have robust construction, providing the highest level of reliability and performance. OPzV batteries have superior deep discharge durability and excellent recharging properties.
