

# Cairo leads the energy storage finance industry

How can Egypt store electricity?

Egypt has been looking at a number of ways to store electricity as part of its ambitions to grow renewable energy capacity to cover 42% of the country's electricity needs by 2030. These include upgrading its power grid and incorporating pumped-storage hydroelectricity stations to help store electricity for future use.

Will EGP 2 trillion be needed in Egypt's energy sector?

The International Finance Corporation (IFC) believes that EGP 2 Trillion are required to be brought into Egypt's energy sector in climate-smart investments by 2030. Egypt is expected to overtake South Africa in the next decade to become the largest electricity market in Africa.

Can batteries solve Egypt's Electricity oversupply problem?

Egypt is exploring the potential of energy storage through batteries to combat our electricity oversupply problem: As Egypt continues to suffer from a major oversupply of electricity, the country is in need of new ways to tackle the issue.

How much FDI is needed in Egypt's energy sector?

FDI is concentrated in the oil and gas industry (around three-quarters of total investments), followed by real estate, manufacturing, financial services and construction. The International Finance Corporation (IFC) believes that EGP 2 Trillion are required to be brought into Egypt's energy sector in climate-smart investments by 2030.

Why does Egypt need more energy?

As the most populous country in the Middle East, with 100 million citizens estimated in 2020, Egypt faces rising energy demand driven by rapid population growth and an expanding economy. This creates significant challenges in maintaining a steady and continuous supply of energy and opportunities for the sector's development.

How much money does Egypt need to control the electrical network?

The minister added that Egypt is currently working to establish centres to control the electrical network with investments of EGP 5.4 billion (US\$344 million), which come in addition to a global control centre at the New Administrative Capital (NAC); the electrical power plant is the largest of its kind in the world.

The solar energy company has a PPA to supply electricity to the poultry farm using a microgrid combining solar PV, storage and diesel generators. The original on-site solar PV station covers 30% of Cairo 3A's energy needs using renewable energy, reducing its reliance on diesel. It is not the first solar-plus-storage project in Egypt, however.

4th UfM Energy and Climate Business Forum Cairo Sustainable Energy Week 2 October 2024 Opening

# Cairo leads the energy storage finance industry

Remarks by Ambassador Christian Berger, Head of the EU Delegation to Egypt Excellencies, Ladies and Gentlemen, I would like to thank the Union for the Mediterranean and the Regional Center of Renewable Energy and Energy Efficiency for inviting us to discuss ...

Energy Storage Excel Financial Model. Includes inputs, outputs and charts. Ready to raise capital. Buy Now ... Tailored for Your Industry; Energy Storage Bundle 2025. Energy Storage Bundle. Financial Model: \$169: \$99: ... Engaging in energy storage cost-benefit analysis can lead to informed and strategic financial planning for successful ...

According to statistics, in 2016 the global cumulative run energy storage project installed capacity of 167.24GW (1227 running projects), which pumped storage 161.23GW (316 running projects), heat storage 3.05GW (190 running projects) and mechanical energy storage 1.57GW (49 running projects), electrochemical energy storage of 1.38GW (665 running ...

Solar & Storage Live MENA is the region's leading conference and exhibition for renewable energy. It is an event that unites all stakeholders: utilities, IPPs, financiers, government, regulators, distributors, contractors, installers, system integrators, and many more that are developing and future-proofing the region's energy sector.

India's government, for example, recently launched a scheme that will provide a total of Rs37.6 billion (\$455.2m) in incentives to companies that set up battery energy storage systems. The country looks to have 500GW of renewable energy online by the year 2030, and boosting battery energy storage capacity is key to reaching this goal.

In conclusion, "Solar & Storage Live Egypt" represents a premier platform for professionals in the solar energy and energy storage sector for knowledge exchange, networking, and business initiation, significantly contributing to the promotion of sustainable energy solutions. The Solar & Storage Live Egypt will take place on 2 days from Tuesday, 29.
