What are the benefits of a desk lamp?

A desk lamp--specifically a task lamp that lets you control the light distribution on your desk--offers benefits that can affect not just your mood but your health as well. A benefit of job-specific lighting: Having an adjustable lamp in your workspace reduces the contrast between the object you are focused on and the surrounding area.

Should you buy a desk lamp?

What's more, you might prefer a desk lamp to be compatible with a handy USB port for charging smartphones. While other lamps will have motion sensors to save on energy. What's more, there are desk lamps that will adjust automatically to ambient light, varying the brightness depending on the time of the day.

What makes a good desk lamp?

Adjustability: "A desk lamp with a flexible design, such as an adjustable arm or a swiveling head, will allow you to direct the light exactly where you need it," shares Frattarelli. The adjustability options will vary between different models. For example, some may allow you to raise or lower the position of the light.

How does a desk lamp work?

Because of its light sensor, the desk lamp can adjust its brightness based on the amount of light in the space. This is a clamp-on model that you can attach to the edge of a desk or a computer stand. It has a wide head that projects light over a large surface area, such as a workstation with more than one monitor.

Can a desk lamp be swapped out?

Most desk lamps come with an LED light, an incandescent bulb, or a CFL bulb, and depending on the lamp itself, bulbs can be swapped out depending on your preference. (Generally speaking, an LED light is more energy efficient than a filament bulb and will last a lot longer.)

The store will not work correctly when cookies are disabled. ... In your workspace, the direction of the light is crucial. With optimal desk lighting, you can concentrate and prevent tiredness.
