

Carport Solar Mounting System Empery Solar

Are solar carports a good idea?

Solar carports are a very viable and straightforward solution that can benefit anyone looking to go solar. They are simple structures that serve as a cover for vehicles and as a source of solar energy production. The simplicity of solar carports is evident when considering their basic form of just solar panels and a ground mounting system.

Should you install solar panels in a carport?

Compared with the other options for mounting solar panels, a carport tends to be a little more expensive.

What is the difference between a solar carport and a ground mount?

The main difference between a solar carport and a ground mount installation is that carports are taller to make space for a car to park. Otherwise, they are quite similar and each offer the benefit of allowing installers to orient the panels at the most optimal angle for sunlight exposure.

Where are solar carports installed?

Lockheed Martin Mission Systems and Training (LM MST) have had solar carports installed at their facility in Clearwater, FL. Rutgers University generates 60% of their annual energy requirements from an immense array of solar carports -- generating an incredible 8 megawatts of power from their 28 acre parking lot. Why do people install them?

What is a residential solar carport?

A residential solar carport combines the carport concept with a ground-mount solar panel array. It's a fantastic dual-use structure, providing you with ecologically-friendly power, whilst protecting your car from the elements. Where can you find one in the wild? If you've seen a solar carport, it was probably in a commercial parking lot.

Which companies have solar carports?

Here are just a few examples: In 2014, Whole Foods constructed 325 kW of solar power at their site in Brooklyn, NY, covering their entire parking lot in solar panels. Lockheed Martin Mission Systems and Training (LM MST) have had solar carports installed at their facility in Clearwater, FL.
