

Cellyte CMTG series GEL SEC Industrial Battery

What is SEC cellyte cmtg?

The SEC Cellyte CMTG series of VRLA Gel single cells builds on the Cellyte CMT platform, adding the benefit of true thixotropic gelled electrolyte to improve cycling capability. The resulting range is perfect for all extreme deep cycling applications. The range also incorporates SEC's industry leading CatVent catalyst technology as standard.

What is a cellyte CMT?

The Cellyte CMT is our flagship large capacity VRLA AGM range, with extra heavy duty high tin plates & CatVent technology. In production now for over 30 years, it is universally acclaimed as the No.1 battery for all high integrity, high specification standby systems.

What is cellyte TSG?

The Cellyte TSG is a premium Gel range, custom designed for all applications where deep daily discharges are required. The first-choice product for extreme renewable energy and semi-traction markets featuring true gel, SEC CatVent technology and thick high tin plates.

What is cellyte TLG?

The Cellyte TLG range is a rugged design that uses gel technology combined with thick lead calcium grids. Perfect for deep cycle applications including renewable energy, golf carts, mobility, marine and semi-traction, where a tough, no-nonsense battery is required.

What is cellyte FTG?

The CELLYTE FTG range uses true gel technology combined with VRLA principles to give a front terminal range with excellent deep cycle capability. The result is a robust product that is ideally suited to hybrid telecom applications and areas with poor grid reliability.

What is the difference between cellyte TLG & VRLA AGM?

The classic range is a true industry workhorse, combining a proven VRLA AGM design with SEC's reputation for quality and dependability. The Cellyte TLG range is a rugged design that uses gel technology combined with thick lead calcium grids.

The SEC Cellyte TUA series of VRLA AGM monoblocs builds further on the Cellyte TLA platform utilising the same classic top terminal construction, but with the addition of pure lead tin positive grids to ensure maximum power performance and life. The range also incorporates SEC's industry leading CatVent catalyst technology as standard.
