

Cellyte FTG series GEL SEC Industrial Battery

What is cellyte FTG?

The CELLYTE FTG range uses true gel technology combined with VRLA principles to give a front terminal range with excellent deep cycle capability. The result is a robust product that is ideally suited to hybrid telecom applications and areas with poor grid reliability.

What is a SEC cellyte 12fta battery?

The SEC CELLYTE 12FTA batteries are constructed using heavy duty at pasted plates and 'U' fold wrapped non woven Absorbed Glass Mat (AGM) separator. The SEC CELLYTE 12FTG batteries are constructed using advanced Gelled electrolyte ensuring reliable performance, safety, outstanding battery life and value.

What is cellyte TSG?

The Cellyte TSG is a premium Gel range, custom designed for all applications where deep daily discharges are required. The first-choice product for extreme renewable energy and semi-traction markets featuring true gel, SEC CatVent technology and thick high tin plates.

What is cellyte TLG?

The Cellyte TLG range is a rugged design that uses gel technology combined with thick lead calcium grids. Perfect for deep cycle applications including renewable energy, golf carts, mobility, marine and semi-traction, where a tough, no-nonsense battery is required.

What is the performance efficiency of cellyte TSG?

A performance efficiency of up to 16.6% combined with low whole system costs, give you an excellent price to performance ratio, and a fast return on investment. The Cellyte TSG is a premium Gel range, custom designed for all applications where deep daily discharges are required.

What is the difference between cellyte TLG & VRLA AGM?

The classic range is a true industry workhorse, combining a proven VRLA AGM design with SEC's reputation for quality and dependability. The Cellyte TLG range is a rugged design that uses gel technology combined with thick lead calcium grids.
