

Almost half of the 33 LAC countries pledged to reach net zero emissions by 2050, including Brazil, Chile, Costa Rica and Colombia. Average annual clean energy investment over the 2026-2030 period needs to increase four-fold compared to the preceding decade in order to get on track for these goals, which would result in fossil fuel consumption ...

Installed ESS capacity in China has grown every year, as the country pledges to achieve net-zero by 2026, and with installed renewable energy capacity continually increasing. In 2021, China saw over 2.3 GW of installed electrochemical ESS capacity, a 50% YoY increase. Among which, 40% was from the generation side, 35% from the grid side, and 25% the end ...

The scale of China's energy storage market continues to increase at a high growth rate. The rapid development of electrochemical energy storage, especially user side energy storage, has once again triggered widespread concern and heated discussion. The industry and academia have not only gradually deepened their discussion on issues such as business model innovation and ...

Recently, Shenzhen CLOU Electronics Co., Ltd. has teamed up with Sumec Complete Equipment & Engineering Co., Ltd. to build the 3.5MW/3.5MWh Lithium-ion Battery Energy Storage System (BESS) Project in Costa Rica (hereinafter referred to as "Costa Rica Project"), which will be delivered in Q1 of 2021.

VRB Energy, a maker of flow batteries headquartered in Canada and owned by a metal resources and mining company, said the first phase of a 40MWh flow battery project in China has now been commissioned. VRB Energy (VRB), 82% owned by High Power Exploration, a base metals-focused exploration company led by noted mining financier Robert Friedland ...

In the past decade, although China's energy storage industry has been slow to usher in its "spring season," Sungrow has remained engaged and enthusiastic in energy storage, and has continued to invest in technology research and development each year. ... and a single user-side energy storage profit model, the commercialization of behind-the ...

Many countries in Latin America share a central 1,100 mile long power grid, as a result, a disruption in Nicaragua, El Salvador, Panama or Costa Rica can affect the others within the region. Costa Rica experienced a nationwide power outage in 2017 as a result of a downed power transmission line in Panama.
