

## Doha tram new energy storage field

The Siemens Avenio tram for Doha, in the Emirate of Qatar, has been honored with the prestigious "Red Dot" Award for Product Design 2017. ... The trams are equipped with Siemens" Sitras HES hybrid energy storage system that quickly charges even during the shortest station stops. With its catenary-free operation, the Avenio serves as a ...

The sustainability drivers for the Tram Stops at Education City were material reduction, ephemeralization through lightweight structural design and systems integration, and energy reduction through passive design optimization. The project brings a new form of transportation to Doha in the form of fast, efficient electric transit. Utilizing a first-of-its-kind catenary free ...

Location: Doha Organization: Mobility Mode of employment: Full time only Description The Siemens Tram Consortium (STC) is currently building the flagship Tram system, called People Mover System (PMS) for Qatar Education City (QEC) in Doha/Qatar. The People Mover System (PMS) is the first low floor catenary-free tram system in the world.

The trams are equipped with Siemens" Sitras HES hybrid energy storage system that quickly charges during station stops. The tram's operation without an overhead contact line opens up new perspectives for vehicle design and will have a positive impact on the urban landscape. Siemens will be delivering a total of 19 three-section trams to Doha.

19 THREE-SECTION, 100% LOW-FLOOR TRAMS Avenio Tram - Education City, Doha, Qatar The Qatar Foundation has commissioned Siemens in 2012 to build a new tram system that operates without overhead contact lines for Education City, the university center in Doha, ... the energy storage systems are

The latest addition to the world tram map is Doha, the capital of Qatar, where soon 19 Siemens three-section Avenio trams will start operation without overhead power lines on a 11.5km, 24 station route through Education City. ... In addition, the new energy storage system for optimised energy consumption and catenary-free operation make the ...

December 10, 2012 10:31 AM Eastern Standard Time DOHA, Qatar--(BUSINESS WIRE)--This week, BYD announced the launch of a large 40-foot containerized Battery Energy Storage Station (ESS) in Doha, Qatar. The BYD ESS is part of a Solar Testing Facility whose ceremonial launch at the Qatar Science & Technology Park (QSTP)...
