

EDO Residential Hybrid Storage Unit EEI

What is Edo energy storage system?

EDO IS THE NEW EEI HYBRID STORAGE SYSTEM DESIGNED FOR THE NEEDS OF MODERN HOUSES. The EDO system includes all the components needed to transform the energy produced by photovoltaic panels into usable energy for household consumption or to store it in the integrated battery and use it in the moment of real need.

What is Edo & how does it work?

WITH EDO YOU CAN MANAGE YOUR ENERGY NEEDS ALL DAY MORNING: peak consumption and low solar production. EDO supplies the missing energy with the residual energy accumulated the previous day. DAYTIME: low and non-constant consumption with high solar production.

Are Edo batteries safe?

SOLID AND LASTING BATTERIES AT THE BASIS OF YOUR ENERGY INDEPENDENCE The batteries used for EDO are state of the art and use the most safe and reliable chemistry, lithium iron phosphate (LiFePo4). This solution guarantees a long life of the batteries for domestic use and gives greater security than other technologies on the market.

What batteries are used for Edo?

The batteries used for EDO are state of the art and use the most safe and reliable chemistry, lithium iron phosphate (LiFePo4). This solution guarantees a long life of the batteries for domestic use and gives greater security than other technologies on the market.

Who is EEI?

Leader in the world power electronics market for over 40 years, EEI has developed consolidated experience in the production of inverters and power supplies in various sectors: renewable energy, heavy manufacturing industry, scientific research and clinical applications for cancer treatment.

What is the difference between Edo and daytime?

EDO supplies the missing energy with the residual energy accumulated the previous day. DAYTIME: low and non-constant consumption with high solar production. EDO accumulates excess energy produced by solar plant and makes it available for any immediate peaks or stores it for evening / night consumption.
