The US Department of Energy (DOE)'s Advanced Research Projects Agency-Energy (ARPA-E) has a program dedicated to research on storage that can provide power for long durations (10-100 hours). Extended discharge of storage systems can enable long-lasting backup power and even greater integration of renewable energy.

What are the different types of energy storage?

Energy comes in multiple forms including radiation, chemical, gravitational potential, electrical potential, electricity, elevated temperature, latent heat and kinetic. Energy storage involves converting energy from forms that are difficult to store to more conveniently or economically storable forms.
