

Energy storage blanket installation video

Where can I buy a water heater insulation blanket?

Get the Reflecto-Foil 40-gallon water heater blanket at Amazon. DIYers with a water tank to insulate, as well as other insulation projects around the house, may want to pick up this reflective foam water heater insulation blanket from US Energy Products.

Does a water heater blanket come with foil tape?

Though it doesn't come with foil tape, purchasing a roll separately will give the installer plenty of material for insulating a tank and other objects, like basement windows or doors. Get the US Energy Products 80-gallon water heater blanket at Amazon or US Energy Products.

Can a water heater blanket fit a 50 gallon tank?

While water heaters range between 30 and 98 gallons, 40, 50, and 60 gallon tanks are most common in homes. Water heater blankets also come in similar sizes, so it's important to find one that will work for your tank. If you have a 50-gallon tank, finding a water heater blanket to fit it should be no problem.

Can a blanket obstruct a burner?

If you have an electric model, the blanket must not cover or obstruct its control box or access panel, typically located on the side of the tank. Also, be sure to cut the insulation back from the burner by at least 2 inches while installing.

How big is a water heater blanket?

The roll of insulation measures 48 inches tall by 76 inches long, covering most smaller water heater tanks with ease. And because it's fiberglass-free, installers can work without masks or long sleeves. Get the Reflecto-Foil 40-gallon water heater blanket at Amazon.

What is a good R-value for a water heater blanket?

The higher the R-value, the more resistance the insulation has against heat transfer. Essentially, more is better. The highest R-value you're likely to find for a residential water heater blanket is R-11, but values of R-7 and R-8 are more common.

Forklift & Pallet Truck Fire Blankets. Fire blankets are the most efficient way to isolate and extinguish a fire in forklifts and pallet trucks. Fire is one of the most common causes of damage and downtime in factories, warehouses, and other workplaces. The smoke alone can ruin valuable stock and equipment.

BlastMat blankets are engineered to protect these workers from the three most dangerous elements of any industrial-arc accident - the extreme heat, the pressure wave, and the lingering burning from materials exposed to the blast. BlastMat blankets are engineered to properly channel energy from an arc flash/blast to effectively protect workers.

The important points in installing the blanket are using the proper blanket, the best method of installation, and materials/hardware for supporting the blanket. ASTM F2676 is the guide to selecting the proper product. The standard rates blankets by the amount of energy they are capable of absorbing before failure, evaluating them by three criteria.

Due to the office not having a drop ceiling, creative methods were used to install the ENRG Blankets. Solid Green Consulting is one of the leading green building consulting firms in the African continent and has a 6-Star Green Star SA interiors and LEED Platinum certifications demonstrating World Leadership.
