

It's significant that we're hosting the largest project combination of renewable PV and also battery storage. [It] simply means South Africa is a trailblazer, and we want to retain that unassailable position, I think, as a country," the minister told a reporter from state broadcaster SABC. ... With a combined solar generation capacity of ...

Norway-based independent power producer (IPP) Scatec has started operations on three solar-plus-storage projects in South Africa, totalling 1,140MWh of BESS capacity. Located in the Northern Cape province, the Kenhardt project consists of three solar plants and a battery energy storage system (BESS) with a capacity of 225MW/1,140MWh.

Excel in a renewable energy future. Modules from our acclaimed postgraduate degrees are also made available as short courses to the public and private sector. These modules are registered with the Engineering Council of South Africa (ECSA) as short courses that qualify for Continuous Professional Development (CPD) points. Each of the courses below will earn

By May 2023, this year had already seen more scheduled power cuts than the entirety of 2022, the report said. Deployment of batteries in commercial & industrial (C&I) and residential markets has been growing in South Africa as consumers look to protect themselves from load-shedding, but the report calls for a concerted effort at the national and municipal ...

The South African Renewable Energy Masterplan (SAREM) articulates a vision, objectives and an action plan for South Africa to tap into these opportunities. It aims to leverage the rising demand for renewable energy and storage technologies, with a focus on solar energy, wind energy, lithium-ion battery and vanadium-based battery technologies, to

The South African Renewable Energy Technology Centre has launched SARETEC online(TM), which will include a series of online offerings such as webinars and online training courses throughout the year. SARETEC is the only accredited Technician Training Centre under the QCTO (Quality Council of Trades and Occupations) for the South African ...

In this edition of the energy storage updater we consider whether solution-driven tenders can aid the advancement of energy storage projects in sub-Saharan Africa. The 2,000 MW Risk Mitigation IPP procurement program (RMIPPPP) launched in South Africa is technology agnostic, and output or performance-based, a first for the region.
