

Energy storage manufacturer contact information

How do energy storage solutions help businesses reduce energy costs?

Our energy storage solutions help businesses cut electricity costs through peak-valley time shifting, allowing power use during off-peak times to balance peak load and reduce the need for additional power supply capacity. In this way, we can help delay expansion and upgrades to power distribution systems, enhancing grid reliability.

Where is the largest energy storage power station in China?

Located in an industrial park in Zhongwei City, Ningxia, the largest stand-alone energy storage power station in China has a capacity - provided by HiTHIUM battery products - of 400 MWh and output of 1.33 billion kWh per year.

What are energy storage systems used for?

Industrial and commercial energy storage systems can be used for peak shaving, load shifting, and backup power. Energy storage systems can be integrated with renewable energy sources such as solar and wind power to help manage the intermittent nature of these sources.

What are industrial and commercial energy storage systems?

Industrial and commercial energy storage systems can be used for peak shaving, load shifting, and backup power. Industrial and commercial energy storage systems can be used for peak shaving, load shifting, and backup power.

What is long-duration energy storage (LDES)?

Long-duration energy storage (LDES) is the linchpin of the energy transition, and ESS batteries are purpose-built to enable decarbonization. As the first commercial manufacturer of iron flow battery technology, ESS is delivering safe, sustainable, and flexible LDES around the world. If playback doesn't begin shortly, try restarting your device.
