

Clearstone Energy was an early mover in securing transmission network connections for battery storage and solar projects in the UK and has two 50 MW BESS sites permitted and under construction by Foresight Group. Clearstone Energy's current BESS pipeline includes eight large scale UK projects with a combined export/import capacity of 2200 MW.

The Koorangie Energy Storage System is a proposed 185 megawatt / 350 megawatt hour storage system to be located near Kerang, Victoria. The project has been proposed by Edify Energy to meet the requirements of its contract with the Australian Energy Market Operator to increase storage capacity in the Murray River Renewable Energy Zone.

MIAMI, Fla., (March 7, 2023) (GLOBE NEWSWIRE) - Origis Energy, one of America's leading renewable energy platforms, today announced the close of an upsizing amendment to their development finance facility doubling capacity to \$750 million. With enhanced flexibility and increased capacity, the credit facility will support further expansion of its solar and energy ...

The oil and gas pipeline transportation technology is the key to the surface production of oil field, and the pipeline insulation technology plays an important role in realizing the safe, stable and energy-saving transportation of crude oil. The composite energy storage pipeline with PCM not only has thermal insulation performance, but also can greatly prolong ...

The Stanwell Battery Energy Storage System is a proposed 300-megawatt / 1,200-megawatt hour battery system in the Central Renewable Energy Zone, located near the Stanwell Power Station. The BESS is being built as part of the site's transition to a Clean Energy Hub.

The UK and Ireland's energy storage pipeline is rapidly growing, with co-located solar PV and storage comprising around 20% of planned capacity, writes Mollie McCorkindale of Solar Media Market Research. ... (BESS) joint venture in Germany, which expects construction permits for up to 400MWh of projects this year. Goldman Sachs-backed BESS ...

A 300MW pipeline of behind-the-meter energy storage projects in Canada and the US will be executed by large engineering firm Honeywell, alongside Canadian project developer NRStor. Sources close to Honeywell had been hinting around a year ago to Energy-Storage.news that the Fortune 100 company was close to entering the energy storage market ...
