

What is the 'guidance' for the energy storage industry?

Based on the above analysis, as the first comprehensive policy document for the energy storage industry during the '14th Five-Year Plan' period, the 'Guidance' provided reassurance for the development of the industry.

How effective is energy storage policymaking?

Yet the most effective approaches to energy storage policymaking are far from clear. This report, published jointly by Sandia National Laboratories and the Clean Energy States Alliance, summarizes findings from a 2022 survey of states leading in decarbonization goals and programs.

What are the different types of energy storage policy?

Approximately 16 states have adopted some form of energy storage policy, which broadly fall into the following categories: procurement targets, regulatory adaption, demonstration programs, financial incentives, and consumer protections. Below we give an overview of each of these energy storage policy categories.

What is the 'guidance on accelerating the development of new energy storage'?

Since April 21, 2021, the National Development and Reform Commission and the National Energy Administration have issued the 'Guidance on Accelerating the Development of New Energy Storage (Draft for Solicitation of Comments)' (referred to as the 'Guidance'), which has given rise to the energy storage industry and even the energy industry.

Should a statewide energy storage program be implemented?

NYSERDA and DPS Staff recommend launching an extensive residential energy storage program statewide, with funding for 200 MW, available until 2030, and that emphasizes maximizing local benefits and benefits to Disadvantaged and Environmental Justice communities.

Does state energy storage policy support decarbonization?

The report highlights best practices, identifies barriers, and underscores the urgent need to expand state energy storage policymaking to support decarbonization in the US. This report and webinar were developed on behalf of the Energy Storage Technology Advancement Partnership (ESTAP).

We propose three types of policies to incentivise residential electricity consumers to pair solar PV with battery energy storage, namely, a PV self-consumption feed-in tariff bonus; "energy storage policies" for rewarding discharge of electricity from home batteries at times the grid needs most; and dynamic retail pricing mechanisms for ...

Background. The Long Duration Energy Storage (LDES) program has been allocated over \$270 million to invest in demonstration and deployment of non-lithium-ion long duration energy storage technologies across

California, paving the way for opportunities to foster a diverse portfolio of energy storage technologies that will contribute to a safe and reliable ...

US\$5 million will be made available for long-duration energy storage (LDES) projects via a competitive solicitation run by the New York State Energy Research and Development Authority (NYSERDA). Governor Kathy Hochul announced the funding, which will be available from New York State's Renewable Optimization and Energy Storage Innovation ...

Under the direction of the national "Guiding Opinions on Promoting Energy Storage Technology and Industry Development" policy, the development of energy storage in China over the past five years has entered the fast track. A number of different technology and application pilot demonstration projects

As Maine grows the portion of electricity derived from renewable sources to cut greenhouse gas emissions, increased energy storage resources are needed to ensure affordable, reliable clean power for Maine households and businesses. LD 1850, An Act Relating to Energy Storage and the State's Energy Goals, was signed into law by Governor Mills on June 30, 2023.

Moving forward on New York Governor Cuomo's goal to procure 2.4 GW of offshore wind capacity by 2030, the New York State Energy Research and Development Authority (NYSERDA) has launched a Request for Information (RFI) to solicit input to inform the development of a Request for Proposals (RFP) for procuring Offshore Wind Renewable ...

On September 5, 2024, the U.S. Department of Energy's (DOE) Office of Clean Energy Demonstrations (OCED) opened applications for up to \$100 million in federal funding to support pilot-scale energy storage demonstration projects. This funding--made possible by the ...
