

## Energy storage projects downstream

The first phase of Atlas will provide permanent underground storage for CO<sub>2</sub> captured by the Polaris project. "Carbon capture and storage is a key technology to achieve the Paris Agreement climate goals," said Huibert Vigevano, Shell's Downstream, Renewable and Energy Solutions Director. "The Polaris and Atlas projects are important steps ...

Mustang Energy was part of a consortium that invested in CellCube in April 2021. Image: Enerox/Cellcube. SPAC Mustang Energy PLC is increasing its effective stake in CellCube to around 25% while a company launching a vanadium mine project in Australia has injected US\$3.5 million in a new flow battery maker. Mustang Energy increases stake in ...

Centrica Business Solutions has secured the development rights for a fully consented 30MW 2hr battery storage plant in Aberdeenshire that will help maximise the use of renewable energy in the Scottish North Sea.. The site in Dyce, near Aberdeen is located near a connection for North Sea offshore wind farms and will contribute towards managing network ...

Long-duration energy storage (LDES) projects in the US will be able to compete for a share of "nearly US\$350 million" of government funding. The funding, ... with the IRA offering incentives for downstream deployment of solar PV, wind and batteries, and the Bipartisan Infrastructure Law offering incentives and stimulus to the upstream ...

The energy storage system of most interest to solar PV producers is the battery energy storage system, or BESS. While only 2-3% of energy storage systems in the U.S. are BESS (most are still hydro pumps), there is an increasing move to ...

That is an 80% increase on the US\$150 billion that the ACP said had been announced by April this year, covered by Energy-Storage.news at the time, nine months after the Act was passed. On the downstream side, ACP said that 184,850MW of clean energy projects have been announced since the Act passed.

Energy storage located "downstream" of a constraint can charge during normal operations and discharge when the grid is congested, avoiding offering on more expensive generation. ... These multi-day constraints are the primary driver of the value of the multi-day energy storage systems modeled in this project. Energy storage increases ...
