

Yougen Tang [email protected] Hunan Provincial Key Laboratory of Chemical Power Sources, College of Chemistry and Chemical Engineering, Central South University, Changsha, 410083 P. R. China ... batteries are the ideal candidates for the next generation energy storage/conversion system, owing to their high power and energy density (8.1 kWh kg ...

Yougen Tang: Supervision, Writing - review & editing. Haiyan Wang: Supervision, ... Energy Storage Materials, Volume 63, 2023, Article 102961. Lu Wang, ..., Meinan Liu. Asbestos-functionalized solid polymer electrolyte for ...

Polymer solid-state electrolyte (SSE) still confronts low room-temperature ionic conductivity for broad application in solid-state batteries. Herein, an eye-catching polymer-in-salt PVDF-HFP/LiFSI/LLZTO composite SSE with ultrahigh ionic conductivity is elaborately designed. In this electrolyte system, poly (vinylidene fluoride-co-hexafluoropropylene) (PVDF-HFP) matrix ...

DOI: 10.1021/acsenerylett.3c00181 Corpus ID: 257515499; Weakly Solvating Cyclic Ether Electrolyte for High-Voltage Lithium Metal Batteries @article{Zhang2023WeaklySC, title={Weakly Solvating Cyclic Ether Electrolyte for High-Voltage Lithium Metal Batteries}, author={Jiaming Zhang and Qiuping Li and Yaping Zeng and Zheng Tang and Dan Sun and ...

AbstractAchieving multi-sodium storage and high operating voltage is key to boosting energy density of NASICON-type materials. However, the activation of more redox couples is usually accompanied by asymmetric and irreversible electrochemical reactions, thus causing fast capacity fading. To address this issue, a medium-entropy concept is proposed, ...

Advanced Energy Materials is your prime applied energy journal for research providing solutions to today's global energy challenges. ... Yougen Tang. Hunan Provincial Key Laboratory of Chemical Power Sources, College of Chemistry and Chemical Engineering, Central South University, Changsha, 410083 P. R. China ...

Yougen Tang: Resources. Haiyan Wang: Writing - review & editing, Project administration, Funding acquisition. ... Based on the energy-storage mechanism of cathode materials during fast-charging, a series of strategies, including nanostructure, doping and multiple-system, are discussed, while emphasis on the pseudocapacitive contribution in ...
