

Energy is essential in our daily lives to increase human development, which leads to economic growth and productivity. In recent national development plans and policies, numerous nations have prioritized sustainable energy storage. To promote sustainable energy use, energy storage systems are being deployed to store excess energy generated from ...

The research on phase change materials (PCMs) for thermal energy storage systems has been gaining momentum in a quest to identify better materials with low-cost, ease of availability, improved thermal and chemical stabilities and eco-friendly nature. The present article comprehensively reviews the novel PCMs and their synthesis and characterization techniques ...

Adding enhancers to the PCM improves their thermal conductivity. Many researchers study the thermal behavior the energy storage systems. The impacts of an aluminum honeycomb (AH) design module for a battery thermal management module are experimentally explored utilizing an infrared imager by Weng et al. [46]. The findings revealed that AH ...

Since 2005, when the Kyoto protocol entered into force [1], there has been a great deal of activity in the field of renewables and energy use reduction. One of the most important areas is the use of energy in buildings since space heating and cooling account for 30-45% of the total final energy consumption with different percentages from country to country [2] and 40% in the European ...

In conclusion, this new kind of electrode material has unique thermal management effect. The supercapacitor with self-temperature regulating electrode has higher electrochemical energy storage performance and better charge discharge cycle stability at high temperature. This new thermal management method provides a new idea for TMS research.

This comprehensive review paper delves into the advancements and applications of thermal energy storage (TES) in concrete. ... the research delved into thermal energy saving and physico-mechanical properties of foam concrete incorporating a form-stabilized basalt powder/capric acid-based composite PCM. The study showcases the potential of ...
