

# Energy storage welding machine welding head

Heltec new spot welding models are more powerful with max peak pulse power of 42KW. You can select the peak current from 6000A to 7000A. Specially designed for welding copper, aluminum and nickel conversion sheet, SW02 series support thicker copper, pure nickel, nickel-aluminum and other metals welded easily and firmly (support nickel plated copper sheet and pure nickel ...

Heltec SW01 series spot welding machines are capacitor storage welding machines. They're high power spot welders with max peak pulse power of 21KW. You can select the peak current from 2000A, 2500A to 3500A. It is easier for you to use the correct spot welding mode with the dual-mode function key on them.

1.Original integrated one-piece column pneumatic welding head,which can be used with any machine model/output source. 2.The pneumatic spot welding head adopts a cushion design,the pressure of the welding needle is independently adjustable,and the downward pressure speed and reset speed of the pneumatic welding head are independently adjustable.

Energy-storage type stud welding machine can weld stud, threaded stud, dowel to metal workpiece. During the welding process, through element point discharge energy storage capacitor discharge, discharge time, 0.001 to 0.003 seconds. Don't need gas or ceramic ring protection, penetration is about 0.1 MM. This method is applicable to the thickness of more than 0.4 mm ...

Energy Grade :0-99T; Welding Mode :Push down spot welding/Mobile pen spot welding; pluse time :0~10mS; Preload Delay: 200~500mS; Adapter Parameter :15V1.3 (Max.) Charging Time :30~40(min) 70BN Spot Welding Mobile Pen Welding Thickness: Pure nickel welding to 18650 battery:0.05~0.2mm Nickel-plated welding to 18650 battery:0.05 ...

Description. This projection welding machine are vertical motion type pressurizing mechanisms. Due to the compressibility of the air, the follow-up of the pneumatic welder is superior to that of the hydraulic welder, and the pneumatic system can be used for the vertical motion welder of all powers, so the projection welding machine mostly uses a pneumatic system.

The pneumatic spot welding head is designed with buffering technology. It is convenient to adjust the pressure of the two welding needles and the speed of resetting and pressing downward the pneumatic welding heads separately. The gantry frame is made of 304 stainless steel. It is hard, steady, and durable.
