What is the EOS cube?

A containerized BESS solution that fits in almost any site and weathers almost any climate. We designed the Eos Cube to bring affordable and reliable energy storage to even the harshest, remotest locations.

What makes EOS a good energy storage solution?

Positively ingenious. Eos is accelerating the shift to clean energy with zinc-powered energy storage solutions. Safe, simple, durable, flexible, and available, our commercially-proven, U.S.-manufactured battery technology overcomes the limitations of conventional lithium-ion in 3- to 12- hour intraday applications.

How many battery modules are in a EOS cube?

Shipped ready for deployment, our Eos Cube comes with all battery modules, electrical equipment, and the BMS pre-integrated into a standard 8 x 16-foot outdoor-rated shipping container. Each Cube is loaded with 672 Eos Z3(TM) battery modules--the current generation of our zinc-powered Znyth(TM) technology. Designed to meet a wider range of needs.

What is Eos & how does it work?

Designed for a decentralized, democratized, and decarbonized energy system, Eos solutions are helping power a cleaner tomorrow, today. Eos storage systems plus Solar and Wind reliably solve the intermittency of green sources--while helping you gain community support.

What happened to EOS Energy Enterprises (EOS)?

EDISON, N.J., Aug. 14, 2023 (GLOBE NEWSWIRE) -- Eos Energy Enterprises, Inc. (NASDAQ: EOSE) ("Eos" or the "Company"), a leading provider of safe, scalable, efficient, and sustainable zinc-based long duration energy storage systems, today announced financial results for the second quarter ended June 30, 2023.

What makes EOS a good battery?

Safe, simple, durable, flexible, and available, our commercially-proven, U.S.-manufactured battery technology overcomes the limitations of conventional lithium-ion in 3- to 12- hour intraday applications. It's how, at Eos, we're putting American ingenuity to work every day to create a positive future for everyone.
