

Why is energy storage important in Europe?

In Europe, there is a growing consensus amongst policymakers that energy storage is crucial to securing affordable and low carbon energy. In May 2022, European Union launched their REPowerEU plan, a part of the European Green Deal, which mandates that 45% of Europe's energy generation needs to come from renewable sources by 2030.

What is the European storage database?

With information on assets in over 29 countries, it is the largest and most detailed archive of European storage. While the report is focused on electrical storage, the database holds project information for multiple other storage technologies (e.g. pumped hydro, CAES, gravity, large-scale thermal etc).

Which countries support the deployment of energy storage?

EASE supports the deployment of energy storage to enable the cost-effective transition to a resilient, carbon-neutral, and secure energy system. The report covers 14 countries; Belgium, Finland, France, Germany, Great Britain, Greece, Norway, Netherlands, Ireland, Italy, Poland, Spain, Sweden and Switzerland.

Which companies are accelerating energy storage?

Because of the growing importance of energy storage, Storm4 decided to spotlight six companies in the European market that are accelerating the sector. Founded in 2016 and based in Stockholm, Sweden, Nortvolt is an operator of lithium-ion battery plants intended to produce batteries for variety of solutions, including EVs and battery storage.

Why should EU countries consider the 'consumer-producer' role of energy storage?

It addresses the most important issues contributing to the broader deployment of energy storage. EU countries should consider the double 'consumer-producer' role of storage by applying the EU electricity regulatory framework and by removing barriers, including avoiding double taxation and facilitating smooth permitting procedures.

Does the Netherlands need energy storage?

With a very high renewable energy penetration and a congested electricity grid, the Netherlands has a big need for energy storage. This is highlighted by the TenneT's estimation for ~9GW of storage needs by 2030. The regulatory environment improved for FoM in 2023 with a reduction on grid fees.

This report lists the top Europe Battery Energy Storage System companies based on the 2023 & 2024 market share reports. Mordor Intelligence expert advisors conducted extensive research and identified these brands to be the leaders in the Europe Battery Energy Storage System industry.

This report provides an in-depth analysis of the competitive landscape within the European grid-scale energy storage market. It highlights the top 25 owners and developers, who collectively hold more than 50% of the total storage capacity in the European pipeline.

Investment in research is key in driving innovation in storage sector. EASE, as the voice of the energy storage industry, is an active contributor of the design of upcoming funding programmes for energy storage research and development and collaborated to the development of important instruments such as the Innovation Fund and Horizon Europe.

Tank storage companies, represented in the Netherlands by the Dutch Association of Tank Storage Companies (Vereniging van Nederlandse tankopslagbedrijven, VOTOB) and in Europe by the Federation of European Tank Storage Associations (FETSA), are essential players in the energy, manufacturing, agricultural and food industries.

If you think there is a company that deserves to be on our upcoming prestigious annual list of Top 10 Energy Storage Solution Companies in Europe - 2020, please write to us about them and the reasons you think they need to be on the list * Submit Top Energy Storage Solution Companies in ...

SolarPower Europe has published its new market intelligence report, the European Market Outlook for Battery Storage 2024-2028. The report illustrates the state of play of battery storage across Europe, with updated figures on annual and total installed capacities up to 2023 and a forecast of future installations under three scenarios until 2028.

Here, we recognize the top 10 energy storage companies in Europe that are at the forefront of this dynamic and essential industry. Top 10 Energy Storage Companies in Europe View the full list. 1. Scatec ASA Solar, Wind, Other Renewables, Energy Storage, Infrastructure & Other. 2. SSE Renewables Wind, Other Renewables, Energy Storage ...
