

Fixed Tilt Solar Racking System Solar First

What is full tilt solar racking?

FULL TILT utilizes self-grounding racking with integrated DC wire-management, enabling faster installation times. Full Tilt solar racking is fixed tilt system that is quickly assembled and angle-adjustable during installation. Designed by BCI Engineering.

What types of solar modules does Full Tilt work with?

FULL TILT's module-agnostic system works with the standard 72-cell module, First Solar Series 6(TM), and any newer, larger module types. We have three module attachment options including threaded fasteners, self-grounding clips, and lock bolts, making the FULL TILT system adaptable to any installers preference.

What are the advantages of Omco solar's Universal module Mount?

Advantages: OMCO Solar's Universal Module Mount rapidly and easily secures modules to the OMCO Origin 1P Tracker with just 2 bolts per module. Bolts can be tightened from below, so ladders are not needed, and installation is fast and safe. The module mount universal design can handle frames from 25 mm to 50 mm high.

Why should you choose sunfig for your solar project?

In merging strengths from market leaders like TerraSmart, RBI Solar, and SolarBOS; combined with smart new project design software from Sunfig, we are able to serve all sectors in the growing utility, community, and C&I solar market, helping make solar energy readily available anywhere.
