

## Fluence energy storage sunstack solution

What is fluence's energy storage technology stack?

Fluence, a Siemens and AES company, today unveiled its sixth-generation energy storage technology stack combining factory-built hardware, advanced software and data-driven intelligence.

What is Fluence technology stack?

Fluence offers an integrated ecosystem of products, services, and digital applications across a range of energy storage and renewable use cases. Our standardized Technology Stack makes it easier for you to rapidly and cost effectively deploy energy storage, and optimize storage and renewable assets.

Which fluence energy storage product is right for You?

Discover the Fluence energy storage product that's right for you. The Gridstack Pro Line now offers a remarkable 5-6MWh capacity within a single enclosure, providing a compact energy solution that boosts efficiency.

What is Fluence's 6th-generation energy storage technology stack?

Arlington, Va. -- June 16, 2020 - Fluence, a Siemens and AES company, today unveiled its sixth-generation energy storage technology stack combining factory-built hardware, advanced software and data-driven intelligence.

How does Fluence reduce energy storage costs?

Over the past decade, Fluence has reduced the total cost of energy storage systems by 90 percent; our new technology stack focuses on driving down the non-battery costs of energy storage systems by up to 25 percent, while empowering gigawatt-sized deployments." Fluence's new technology stack includes three components:

What is the difference between sunstack & Fluence cube?

The factory-built design brings consistent quality control to your storage system for the highest level of safety. our 6th generation technology stack, Sunstack incorporates more than 3 years of design and deployment experience. Fluence Cube is your building block for better energy storage. Proprietary and confidential. Do not distribute.

Our mission is to create a more sustainable future by transforming the way we power our world. Energy storage is critical to this transformation and we bring the proven technology solutions and services that overcome the commercial and regulatory barriers that stand in the way of modernizing our energy networks.

Baringa: Energy Storage Cuts Oversupply by 60 Percent. Battery-based energy storage allows the storage of excess wind and solar electricity at times of oversupply until it can be redistributed when needed. The

# Fluence energy storage sunstack solution

technology helps harvest the maximum amount of clean but intermittent renewable electricity for Irish households, industry, and data ...

With energy storage as the linchpin of decarbonized electric grids, it's not surprising, therefore, that they are also leading the way in global energy storage deployments. Fluence, which has nearly 1 GW and more than 1.5 GWh of energy storage deployed or awarded in these two markets, is proud to support our partners there with technology ...

Download the Sunstack technical specification. Any transfer of personal data processed by Fluence entities established in the European Economic Area (including the member states of the European Union, Iceland, Norway, Switzerland, and Liechtenstein) to areas outside of this area is based on Binding Corporate Rules and EU Standard Contractual Clauses.

The company offers proven energy storage solutions designed to address the diverse needs and challenges of customers in a rapidly changing energy landscape. One of Fast Company's Most Innovative Companies for 2019, Fluence has now deployed or been awarded about 1 gigawatt of energy storage projects in 18 countries.

To fully realize the benefits of the plan, we need to take action by implementing the available technologies, like energy storage, that can help achieve these goals today. Energy storage is a flexible resource that can significantly offset carbon emissions, while enhancing system reliability and increasing system efficiency and resiliency.

Fluence is 100% focused on driving the clean energy transition and brings deep understanding of energy storage systems and operations. Fluence Academy, our new, online training platform, enables Fluence customers to manage their own training more effectively, at their own convenience and pace.
