

GM2A11 Ground Mounting System

What is GTS ground mounting system?

GTS ground mounting system is a cost performance optimized design; the supporting footing is delivered with highest pre-assembly to unfold at site. The optimized design is carried out by experienced engineers, this is important as high loads caused by wind and snow.

What is a ground mount for solar panels?

They provide a secure mounting structure for solar panels on a single row of vertical 3" , 4" or 6" Schedule 40 pipe. Our best looking ground mount, the MT Solar Ground Mount uses steel beams for vertical supports instead of pipe. The support beams bolt to a base with leveling bolts. It uses IronRidge XR rails and clamps for module attachment.

What are the rails for a standardized ground mount configuration?

The rails for the standardized Ground Mount configuration are set at 14'. Module Clamp size depends on the module thickness. Use the table below to determine which Module Clamp will fit your projects module thickness. Part Numbers End Clamp End Clamps depend on the module thickness.

How do I contact a solar panel ground Mount expert?

Contact us toll-free at (877) 297-0014 for expert assistance and low wholesale prices for most solar panel ground mounts. Wholesale PV ground mounting systems for residential and commercial solar panel systems. Solar ground mount experts for over 20 years with low prices.

Who makes solar panel ground mounts?

Solar Electric Supply has been specializing in solar panel ground mounts for PV module systems for over 20 years. All of the quality name brands we carry feature weatherproof aluminum or stainless steel components for corrosion resistance.

What is the best solar ground mount?

Our best looking ground mount, the MT Solar Ground Mount uses steel beams for vertical supports instead of pipe. The support beams bolt to a base with leveling bolts. It uses IronRidge XR rails and clamps for module attachment. The ProSolar GroundTrac mounting system enables fast installation using time-tested Rooftrac rails.

The advantage over other solar ground mounting systems is that these structures allow the installation of bigger systems with great and simpler tilt variability, needing only one adjustment for all the panels, unlike pole mounted ...
