

What is a GSE in roof system?

The special feature of the IN-ROOF SYSTEM is that the solar panels are built into the roof and replace part of the tiles. This means that the roofs maintain their appearance whilst producing sustainable energy. KemkensSolar chose the GSE IN-ROOF system as it adapts to different types of solar panel, is lightweight and is proven to be watertight.

Why did kemkenssolar choose the GSE in- roof system?

KemkensSolar chose the GSE IN-ROOF system as it adapts to different types of solar panel, is lightweight and is proven to be watertight. As the panels are built into the roof, as fitters we have a marked preference for this sustainable application from GSE Integration. The product falls totally within our vision of quality and safety.

How long does it take to install a GSE roof system?

The most competitive integrated system for roof renovations and new builds. 10 to 16 panels can be installed in around 6 hours. The GSE IN-ROOF SYSTEM is lightweight and takes up very little space: 116 half-frame per pallet. Allows all types of configuration, with or without a roof window (compatible with VELUX, FAKRO and ROTO).

How much space does a GSE roof system take up?

The GSE IN-ROOF SYSTEM is lightweight and takes up very little space: 116 half-frame per pallet. Allows all types of configuration, with or without a roof window (compatible with VELUX, FAKRO and ROTO). Excellent fire and impact resistance, perfect, long-lasting watertightness, optimal ventilation.

Why should you choose GSE integration for a roof-mounting system?

The GSE IN-ROOF roof-mounting system is not only sufficiently flexible during installation but the houses also look good. As a historical partner, we have been working with GSE Integration since our creation and distribute their solutions to our installer customers.

What is a GSE Solar System?

Mounting. GSE GSE Integration. GSE Integration is an in-roof mounting system that allows the building to install standard solar panels on new builds or roof-renewal properties. It's compatible with most panels on the market, making it a great all-around choice.
