

Gel Battery 17AH 12V Easun Power

Are easun power batteries reliable?

EASUN POWER's LiFePO4 batteries are highly efficient and reliable. Made with Lithium Iron Phosphate, they outshine other types in safety and longevity. Equipped with a top-tier Battery Management System, they provide optimized performance across a variety of applications.

What is a gel battery?

The 12V 17.00Ah gel battery offers a high cycle life in a large range of cyclic applications including mobility, golf, solar and wind. Power Sonic's state-of-the-art manufacturing and process control combined with rigorous quality assurance procedures guarantee consistent and reliable performance. CAN'T FIND WHAT YOU WERE LOOKING FOR?

Are gel batteries good?

The sealed design of gel batteries also minimizes maintenance needs and eliminates the risk of spills, making them a convenient and reliable option. With their robust performance and longevity, solar gel batteries ensure consistent power supply, even during adverse conditions. Agm vs. gel battery: are gel batteries better?

How do you charge a gel battery?

Here are some crucial tips to keep in mind when charging your gel battery: Use a constant voltage charger: Always use a charger designed for gel batteries that can maintain a constant voltage. This prevents overcharging and ensures the battery receives the correct charge.

Are gel batteries better than lead-acid batteries?

Deep Cycle Performance and Lifespan: Gel batteries offer better deep cycle performance and can be discharged to lower levels without damage. They typically have a longer lifespan when used correctly. Lead-acid batteries have moderate deep cycle capabilities and a shorter lifespan, especially if not maintained properly.

Do gel cell batteries need venting?

Gel cell batteries typically do not require venting. They are sealed and recombine gases internally during charging, preventing the release of hydrogen gas. This makes them safer for use in enclosed spaces. However, in extreme overcharging situations, they may release gas through a pressure relief valve.
