

Our estimates of storage capabilities, or stored electrical energy, for PSH are based on the International Commission on Large Dams" database of existing dams and reservoirs (ICOLD, 2021), country-level storage data and IEA research. Energy storage capability calculations depend on the potential energy of water that can be used for power ...

The IEA's flagship World Energy Outlook, published every year, is the most authoritative global source of energy analysis and projections. It identifies and explores the biggest trends in energy demand and supply, as well as what they mean for energy ...

Due to the growing need for novel energy storage solutions and the integration of renewable energy, the global market for energy storage, which includes both CAES and LAES, is expected to develop significantly and reach over \$8 billion by 2024 [41]. Fig. 2 shows the global increase in PHS and CAES capacity in the past few years, as described in ...
