

Ground Mounting System Sandy Area Kinsend Metal

Who is kinsend solar mounting system?

Kinsend is a professional designer and manufacturer supply the solutions of solar mounting systems as per your requirement, which covers solar ground mounting systems, solar rooftop mounting systems, solar farm, solar carport, ground screw.. Solar ground mounting system is typically applied on flat open field ground.

What is a solar ground mounting system?

Solar ground mounting system is typically applied on flat open field ground. Main components are high pre-assembled in our factory, which save lots of your on site installing time and cost.

What does kinsend do?

Kinsend offers solar PV mounting solutions supported by a veteran R & D team, it covers a range of products and services, including solar rooftop/solar ground/solar carport/solar farm mounting system, solar green house and ground screw as foundation.

What is ground mounting system?

Ground mounting system is made of aluminum to mount on concrete foundation or ground screws, Quick installation with large-scale ground photovoltaic system power station construction progress. Ballast tripod flat rooftop mounting system is a type of solar panel mounting system that is designed for flat rooftops.

Why should you choose kinsend solar PV mounting solutions?

Kinsend offers solar PV mounting solutions supported by a veteran R&D team, which provides tailored efficient designs per customer's budget and project conditions.

What is a PV ground mounting system?

This type of installation is widely used in many soil plots. The main material of the pv ground mounting system is high-purity aluminum alloy, which is light in weight, pre-assembled components are simple structural design, effectively reducing the onsite cost. The support surface is anodized, with high corrosion resistance.
