When your solar panels produce more power than your household needs, your home storage battery will begin to charge. The energy stored will then be used to power your home appliances when the sun isn't shining. Any energy that's leftover can be sent to the grid for you to receive credits on your bill at your feed-in tariff rate.

A government review of the safety of home energy storage systems in 2020 said that "there have been few recorded fires involving domestic lithium-ion battery storage systems". The cells need to work within a specific range of conditions set out by the manufacturer for:

In 2019, Generac acquired battery manufacturer Pika Energy and has since integrated their technology into the launch of their own Generac-branded home storage solution: the Generac PWRcell.
