

Intelligent smart switch does not store energy

What is a smart switch?

A smart switch is an energy-efficient, electrical switch that can be controlled via a smartphone app, voice assistant, or other smart home device. Smart switches are conveniently installed to replace traditional light switches, but they can also be used to control fans and appliances, too.

Why should you buy a smart switch?

Convenience. Smart switches can be controlled at any time and from anywhere, as long as there is a WiFi connection. For example, if a homeowner is out for the day or is traveling, lights or appliances can be turned off to save on energy. Similarly, lights can be turned on remotely at night for added security.

What features do smart switches offer?

Here are some features offered by many smart switches: Voice-enabled control through a device such as the Google Home, Amazon Echo, or other home speaker. Programmable timing. For example, lights may be set to turn off at bedtime each evening or a coffee maker may be set to turn on at a certain time each morning.

Are smart switches more expensive than traditional light switches?

While smart switches are more expensive than traditional light switches, they offer several benefits: Convenience. Smart switches can be controlled at any time and from anywhere, as long as there is a WiFi connection. For example, if a homeowner is out for the day or is traveling, lights or appliances can be turned off to save on energy.

How do smart switches work?

Most smart switches connect to your home Wi-Fi network as their connectivity method to access the internet and remote features. Some may require a separate hub or bridge to facilitate local wireless communication, whether it's a network for Z-wave, Matter, or a brand-specific platform.

Can a smart switch integrate multiple devices?

Multi-device Integration. As part of smart home automation, most smart switches can integrate several devices for a more convenient living experience. For example, a smart switch could be programmed as a custom alarm - turning on lighting in the morning along with favorite music.

Existing Octopus Energy customers can also switch to the Intelligent Go tariff via the Octopus IOS or Android app. How do you login to Intelligent Octopus Go? Is there a specific Intelligent Octopus App? When you switch to the Intelligent Go tariff you'll be asked to run a test charge in the Octopus Energy IOS app or Android App. As soon as ...
