

Italian energy storage battery recycling

Can Italian batteries be recycled?

In Italy, there is a lack of significant mineral resources of nickel, cobalt, manganese and lithium, which can be recovered from exhausted batteries. The Italian supply chain for battery recycling can become a sort of "mine" for these metals, helping overcome the limitations linked to their natural availability in our country.

What is the Italian supply chain for battery recycling?

The Italian supply chain for battery recycling can become a sort of "mine" for these metals, helping overcome the limitations linked to their natural availability in our country. A supply chain to lead to this process is a driving force for development and growth, both for large companies and small and medium Italian enterprises.

Is Italy a good place to start a battery industry?

Today, Italy holds significant opportunity for the modern battery industry, with its strategic location and highly skilled workforce. Italy has a rich industrial heritage, especially as a hub of Europe's automotive industry, offering access to a large, skilled workforce.

What is the supply chain for battery recycling?

The supply chain for battery recycling is a great opportunity for Italy's production sector. This is the primary goal of the second IPCEI program (Important Project of Common European Interest), sponsored by the MiSE and approved by the European Commission.

What is Italy's largest battery cell factory?

Italvolt's 45GWh battery plant will be the Italy's largest, independent, battery cell factory. The battery cell factory will focus on creating new opportunities for re-skilling and upskilling workers from Italy's automotive industry.

How will italvolt support Italy's Green industrialisation ambitions?

Italvolt intends to honour Italy's important industrial legacy by supporting the country's green industrialisation ambitions, and by delivering battery cells which will help drive decarbonisation across a variety of industries. Italvolt's 45GWh battery plant will be the Italy's largest, independent, battery cell factory.
