

Italian energy storage cabinet factory quotation

What are Italy's energy goals?

Italy's ambitious energy goals, outlined in the National Integrated Energy and Climate Plan (PNIEC), mark a transformative shift toward renewable energy. By 2030, the country is targeting 28GW of wind power and nearly 80GW of solar capacity, making energy storage essential for ensuring grid stability and maximizing renewable integration.

What is SAET's role in energy storage?

SAET is a company present on the international Energy Storage market, providing turnkey systems of various sizes. They handle the project from the initial steps, such as feasibility study and cost-benefit analysis, to the definition of the sizing and optimal energy/power ratio, and the detailed design and optimization of the storage system performance.

Will Italy deploy 900MW in 2023/2024?

Research firm LCP Delta recently forecast that after annual grid-scale deployments of just 20MW in the last few years, Italy would deploy 800-900MW in 2023/2024, second in scale only to the UK. In this piece, we interview executives from three developers looking to gain a foothold in the market: Aquila Clean Energy, Field and Innovo Group.

What is SAET's Energy Storage Next Generation?

SAET's Energy Storage Next Generation is a plug&lay product, already designed, sized, and ready to be installed and used. It also offers extreme flexibility, which is expressed in sizing. This is achieved using a proprietary microgrid simulation system from Falck Renewables Next Solutions.
