

Can Italy create a Gigafactory for electric vehicles?

One of those projects by Italtel Spa aims at creating in Italy one of the largest gigafactories in Europe for the production and storage of lithium-ion batteries for electric vehicles. The plant on a 100-hectare site in Scarmagno, Northern Italy has a planned capacity of 45 GWh for about 550,000 electric vehicles per year.

Will Italy build a new EV battery factory?

Italian start-up Italtel wants to build a EUR4 billion EV battery manufacturing facility in Italy. The site for the project is currently being identified, and the factory's initial capacity should reach 45 GWh. A rendering of the planned factory.

How will Italtel support Italy's Green industrialisation ambitions?

Italtel intends to honour Italy's important industrial legacy by supporting the country's green industrialisation ambitions, and by delivering battery cells which will help drive decarbonisation across a variety of industries. Italtel's 45GWh battery plant will be the Italy's largest, independent, battery cell factory.

MASE report on Italian battery storage development: Sphera among top players. The latest MASE report covering Italian project permitting procedures as of April 30th 2024 for standalone battery storage, pumped hydro and thermal generation plants > 300 MW was just published last week [click here](#).

This is the second deep dive in our four-part series that explores why battery-based energy storage is key to addressing Southern Europe's grid flexibility challenges. This article delves into the intricacies of the Italian energy market and how the current high reliance on gas-fired power generation puts the country's decarbonization targets at risk and impacts ...

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual payments covering investment and operating costs for those developing, building and operating large-scale energy storage in Italy.

ENERGY STORAGE Telis Energy launches Italian subsidiary targeting 3GW battery storage and hybrid pipeline. February 27, 2024. UK-headquartered renewable energy development platform Telis Energy has launched an Italian subsidiary Telis Energy Italy, which will target a 3GW pipeline of battery energy storage and hybrid projects by 2030. ...

The rise of renewable energy has exposed a new problem: our lack of energy storage solutions. From lithium ion batteries to liquid air, Earth reviews the battery of the future. -- Since the Industrial Revolution, the world's energy demand has grown exponentially, and fossil fuels have been the answer to our needs.

Italian takeaway car energy storage battery

Following the 70MW being delivered by NHOA Energy in the context of the Fast Reserve Units, the award of this project confirms NHOA Energy's capability to design systems able to provide all the different energy storage services in the Italian market and paves the road for additional deployments in sight of the future storage auctions to reach the 2030 ...

These developments are propelling the market for battery energy storage systems (BESS). Battery storage is an essential enabler of renewable-energy generation, helping alternatives make a steady contribution to the world's energy needs despite the inherently intermittent character of the underlying sources. The flexibility BESS provides will ...
