

# LV6548 MPP Solar

Why should you buy a lv6548 solar inverter?

Why we like this inverter: UL1741 Rated: The LV6548 model is UL1741 compliant, making grid connections a lot easier. Net Zero: Offset your utility power by charging loads directly from solar Timer control: program the unit to only charge batteries from the grid during certain hours.

Does lv6548v 500V support 390V?

The LV6548V 500V, is now available and features PV upgrade from 390V (on LV6548V) to 500V. Backward parallel compatibility to LV6548V (390V) is confirmed, so users who have previously purchased the 390V version can simply buy the new 500V version and parallel with ease.

Is the lv6548v 500v a 120V output inverter?

Similar to the LV2424 and 3048LV-MK, the LV6548V 500V is also a 120V output inverter alone however split phase output (120V/240V) can be configured by using minimum 2 or more units in parallel. UL1741 compliance (TUV certified) for US markets and CSA for Canada.

How to install LV 6548 inverter?

Insert striped cable into male terminal and crimp male terminal as shown below. 1. Open circuit Voltage (Voc) of PV modules not to exceed maximum PV array open circuit voltage of the inverter. 2. Open circuit Voltage (Voc) of PV modules should be higher than the start-up voltage. LV 6548 INVERTER MODEL 8000W Max.

What is a split phase inverter lv6548?

Split Phase Capable: Achieve split phase output (120V/240V) by using a minimum of 2 or more units in parallel. Inverter Features: LV6548 Specifications:

What is a parallel inverter lv6548?

Parallel kits are built-in. This model allows batteryless operation (batteries are optional). Why we like this inverter: UL1741 Rated: The LV6548 model is UL1741 compliant, making grid connections a lot easier.
