

LVES 3 2kWh Home L Series ESS

What is a hanchu ESS 3.2kw HPD lithium battery?

Each Hanchu Ess 3.2kW HPD Lithium battery has an individual built in modem. When running, the battery can be connected to the internet, allowing specific monitoring, technical support and future upgrades. Having a 100% DOD, the Ess 3.2kW makes every bit of energy count.

Why should you choose hanchu ESS HV 2.7K?

HANCHU iESS provides comprehensive services for your equipment - seamless integration, lifelong security monitoring and complete control aiming at enhancing customer good experience and assistance to reduce carbon emission globally. Discover the exceptional capabilities of HANCHU ESS HV 2.7K, an advanced high-voltage energy storage battery.

How many kW can a hanchu ESS have?

With the charge rate being 40A, when paired with a Lux controller, this will allow 2kW with a single battery. Additionally, the Ess 3.2kWh has a discharge rate of 60A per battery. This means that you can achieve up to 3kW of discharge power. The Hanchu Ess 3.2kW battery will remain at full capacity at temperatures as low as 0°C.

How much energy does a ESS battery use?

Having a 100% DOD, the Ess 3.2kW makes every bit of energy count. The lithium battery operates on 100% of its capacity, which is normally around 90% on other battery brands available on the UK market. As a result, this makes monitoring completely accurate as well, with 100% meaning full capacity of the battery.

What is a 3.2kw lithium battery?

The 3.2kW Lithium Battery is the first in the UK to benefit from high-power density lithium cells, helping it to achieve exceptional charge and discharge rates. Set up in a compact and sleek way, the battery comes with long and short cables for every unit, and monitoring of each battery via an app or web portals helps you get the maximum out of it.
