

Land Dream Series charge controller is 10A to 60A PWM charge controllermet for 12v,24 and 48V systems. The first step needed to set up the land dream charge controller,it's to connect to a 12v or 24v battery and this video we'll use a 12v battery.

Ld solar focuses on the R&D,production and sales of solar controllers. It has been deeply involved in the industry for more than 10 years and only produces solar controllers. If our controllers weren't well done,we would have been eliminated by the market. Service Support

Sky Dream Series (SD in short) is our newly designed PWM solar controllers. Its specialty lies in the inner 32 bits CPU, which enables the controllers to work faster and more stable. Besides, our unique black&Red big terminals design facilitate your connection in real application.

Ocean Dream Series (OD in short) is our newest designed PWM solar controllers. Its specialty lies in the inner 32 bits CPU, which enables the controllers to work faster and more stable. It built 4 USB port and a screw driver inside. Besides, our unique black & Red big terminals design facilitate your connection in real application.

Tracer Dream 75V Series adopts MPPT technology. It's also ran by 32 bits CPU, so stability and speed can be guaranteed. Based on the synchronous rectifier technology, the transfer efficiency of circuit can be increased up to 98.5% and the Pmax tracking accuracy up to 99. 5%.
