The US Department of Energy is on a roll when it comes to backing the US domestic battery industry. In July, the agency's Loan Programs Office announced a conditional commitment of up to \$1.2 billion for a direct loan to battery separator, extruder, and engineering services company ENTEK to finance a lithium-ion battery separator facility in Indiana.

The heightened focus on energy storage is driven by the need for a reliable energy supply amidst frequent power outages and grid failures. As Lebanon faces a chronic electricity shortage, the integration of energy storage systems has become paramount. These systems ensure a steady supply of electricity,

Israel's national plan to enable wider deployment of energy storage. Created through a sub-committee of the National Planning and Construction Council together with the Ministry of Energy and Infrastructure, the plan would enable the development of energy storage at solar PV plants, as well as for residential use. electric vehicles, government, island grids, israel, national ...
