

# LiFePO4 Rechargeable Battery Pack Dawnice Battery

How do I charge LiFePO4 batteries?

To charge LiFePO4 batteries, you'd need a BMS (Battery Management System) that accepts the output of your APC (Uninterruptible Power Supply), charges the LiFePO4 batteries, keeps them at the desired voltage, and provides the APC with the voltage it requires, even if it's a false representation. You'd also need some smarts/circuitry between the APC and your batteries.

Why should you choose dawnice solar energy storage battery?

To Strive Forward No Energy Waste. Dawnice is a top solar home energy storage battery and industrial and commercial energy storage battery factory located in China. We insist on using high-standard A-grade lifepo4 cells, protective board and other accessories to ensure that our products can give customers the best experience.

Why do we use a-Grade LiFePO4 cells?

We insist on using high-standard A-grade lifepo4 cells, protective board and other accessories to ensure that our products can give customers the best experience. Our goal is to provide high-performance and competitive products to help you live a better life Efficient, clean and environmentally friendly, smart life.

How many production lines does dawnice have?

Dawnice has 5 fully automated production lines, and focuses on independent R&D and production. 80% of the engineers on the job have worked in the lithium battery industry for more than 10 years.
