Ontario energy minister Todd Smith said in a LinkedIn post that the average price of winning energy storage bids in LT1 was CA\$672.32/MW (US\$492.05/MW), which was a 24% decrease from the CA\$881.09/MW average price of the previous round last year. ... Familiar names to Energy-Storage.news readers Brookfield Renewable and Aypa Power also got big ...

The German government has opened a public consultation on new frameworks to procure energy resources, including long-duration energy storage (LDES). Under the proposed Kraftwerkssicherheitsgesetz, loosely translated as the Power Plant Safety Act, the Ministry for the Economy and Climate Change (BMWK) would seek resources, including 12.5GW of ...

Concerning utility-scale energy storage, there is a pressing need for its deployment. Additionally, the crucial role played by grid-side energy storage installations, dominated by standalone and shared energy storage, is expected to be a significant driver for the growth of utility-scale storage. Projections for New Installations of ESS in 2024

Winning bids as low as IR3.41/kWh (US\$0.041/kWh) have been registered in a tender for solar PV paired with battery storage hosted by the Solar Energy Corporation of India (SECI). Bidding closed yesterday (16 July) in SECI's tender for 1,200MW of solar PV and 600MW/1,200MWh battery energy storage systems (BESS) to be deployed at locations ...

Utility-scale Energy Storage: Forecasted for 2024, new installations are set to reach 55GW / 133.7GWh, reflecting a solid 33% and 38% increase. The decline in lithium prices has led to a corresponding reduction in the cost of energy storage systems, bolstering the economic feasibility of utility-scale energy storage and revitalizing tender markets.
