

# MPPT Solar Charger Model 5315-01 High Sierra Electronics

What are MPPT solar charge controllers used for?

Smaller capacity MPPT solar charge controllers with a current rating from 20A to 40A are used for many different applications, including off-grid cabins and homes, RV's, boats, caravans, telecommunications and remote site backup. These mid-range MPPT solar charge controllers are available from many different manufacturers.

What are the different types of MPPT charge controllers?

The Prostar range of MPPT charge controllers are available in 25A and 40A versions with a 120V input voltage limit. The extremely fast MPP tracking can perform a full voltage sweep in less than 1 second using the Trakstar technology.

What are the best solar charge controllers?

Everone of the leading manufacturers of cost-effective power products including a wide range of solar charge controllers. The well-known Tracer and TRIRON series of MPPT's are a very popular choice for solar enthusiasts across the world due to the easy setup, good MPPT tracking, and low cost.
