Myrtillo shop is located at Divarata junction on the way to Myrtos beach. It presents a big selection of Greek traditional products and many local products too. You can just stop here to meet the 3 friendly ladies that own it. ...

Caring for Your Blue Candle Cactus. The word "Myrtilocactus" comes from Greek words meaning "cactus" and "small myrtle." But let's get to the important stuff - how to keep this plant happy and healthy!. The blue candle cactus grows quickly and can get huge - up to 12 to 16 feet tall!

Feed the myrtillo cactus once per month in the spring and summer with a cactus fertilizer. Add the fertilizer directly to the soil or dilute in your watering can. Dinosaur Back Plant Propagation. Propagate the myrtillo cactus by cuttings in the summer. Use a sharp and sterile knife to remove stems from the mother plant.

Myrtilocactus geometrizzans f. cristatus "Variegatus" is a stunning, slow-growing cactus with variegated stems with a central growing point that creates multiple growing points that crowd and push against each other. The stems are ...
