

Mango Power Union Mango Power

What is Mango Power Union?

Mango Power Union is a platform that lets you see and control your home's energy production and consumption in real-time with the Mango Power App. Customize your energy usage, optimize for independence, protect against outages, or increase your savings; whatever your goals, you can use the Mango Power Union to use your energy smarter. The High-Class EV Polymer LFP Battery Cell (Ni, Co, Mn Battery) is part of this system.

What makes Mango Power a great power station?

Mango Power's Power Union is a home and portable, all-in-one power station. It consists of two parts: a large, heavy-duty home base and a smaller, detachable unit designed for portability. (The unique features and benefits of the Power Union that make it a great power station are not explicitly stated in the passage, so they cannot be highlighted.)

Can the Mango Power Union charge a solar system?

The Mango Power Union can charge a solar system with 2kW MPPT solar charging (60V-150V) and 3.3kW AC charging. It can be charged with a roof solar system or portable panels, depending on the situation.

What makes Mango Power unique?

Mango Power's unique features include a capacity that remarkably exceeds that of other solutions in the market, ensuring a robust and long-lasting energy coverage. It also has the world's-first built-in dual PV inverter, which promises some of the fastest charging speeds in the market, either through AC wall outlets or solar panels.

How much does a Mango Power unit cost?

The super early bird price for a Mango Power unit is USD2,799 for end consumers. Inquiries for wholesalers, distributors, and installers can be made to sales@mangopower.com.

With the addition of two bundles (Mango Power E + the Mango Power battery), the capacity will reach up to 14kWh. Give a quick charge on your Mango Power E unit: The battery percentage could reach 80% in 1 hour with Mango Power E fast charging cable recharging and 100% in ...
